

Quarterly Feed Production Statistics for the Quarter Ending December 2012

These statistics report total tonnage of manufactured animal feed and total tonnage of raw materials used in compound feed production.

These statistics no longer report species-specific production statistics.

The companies who have provided NZFMA with production statistics for the quarter ending December 2012 is set out at the end of the report together with the companies who provided statistics for the same quarter in 2011.

Compound Feed Production:

Total compound feed production for the December quarter 2012 was 279,041 tonnes, which has risen 8% compared to the same quarter in 2011.

The North Island produced 182,195 tonnes (65.3%), and 96,846 tonnes (34.7%) was produced in the South Island.

232,926 tonnes (83.5%) of compound feed was sold as bulk. The remaining 46,115 tonnes (16.5%) was sold as bagged feed.

Raw Material Use:

Total raw material usage is 275,902 tonnes which has risen 11.6% compared to the same quarter in 2011.

- Wheat is the most popular grain at 93,999 tonnes (55.5% of grains used), which is down 10% compared to the same quarter in 2011.
- Barley is second, at 30,063 tonnes (17.8% of total grains used). Barley is down 2.7% compared to the same quarter in 2011.
- Third is sorghum at 24,039 tonnes (14.2% of total grains used), which has risen 231.3% compared to the same quarter 2011.

For the North Island, wheat is the most popular grain used for raw feed production, which is at 55,885 tonnes (54.1% of grains used). Second is sorghum which is at 20,662 tonnes (20% of grains used). Third is maize at 15,497 tonnes (15.0% of grains used).

For the South Island, wheat is also the most popular grain at 38,114 tonnes (57.7% of grains used). Second is barley at 19,840 tonnes (30.0% of grains used). Third is triticale at 4,592 tonnes (7.0% of grains used).

For plant protein, soya meal is the most popular which is at 31,731 tonnes (50.6% of total proteins used).

For animal protein, meat and bone meal (non-poultry) is the most popular at 9,555 tonnes (15.2% of total proteins used).

Imports, Palm Kernel and Copra Rolling Summary – major source is palm kernel Imports:

Palm kernel imports are up 2.7% to 386,177 tonnes compared to the same quarter in 2011.

330,191 tonnes (85.5% of total imported palm kernel) of palm kernel was imported into the North Island. 55,987 tonnes (14.5% of total imported palm kernel) was imported into the South Island.

For copra, only 862 tonnes was imported to the North Island for the December quarter 2012.
